Consistent with the vision that stretches beyond traditional boundaries and barriers between collections, Floor Gres designs its color ranges on the basis of a general color plan drawn up taking into consideration the evolution of style and architectural trends: the Florim Color System. This system ensures the color compatibility between materials belonging to different collections. The architect selects the Floor Gres materials according to his/her needs and finds them perfectly compatible.

En harmonie avec une vision qui dépasse les frontières traditionnelles et les barrières entre les collections, Floor Gres projette ses gammes de couleurs sur la base d’un plan-couleur général, élaboré en considérant l’évolution du style et les tendances de l’architecture : le Florim Color System. Ce système garantit la compatibilité chromatique entre des matériaux appartenant à des collections différentes. L’architecte choisit et combine les matériaux Floor Gres selon ses exigences, et ils les trouve parfaitement compatibles.
